Husqvarna

FAST INDUSTRIAL CONCRETE POLISHING

HIPERTROWEL™ is a complete concrete surface finishing system and a Husqvarna product brand. The HIPERTROWEL™ system enhances the strength and abrasion resistance of the floor while reducing maintenance and costs. HIPERTROWEL™ uses superior diamond tools and advanced driver technology for trowels to create a functional polished concrete floor obtained at the speed of ride-on trowel finishing.

HIPERTROWEL FINISH

A satin or glossy salt and pepper-looking surface for industrial floors. Primarily an indoor application targeting large areas where surface flatness is already sufficient, such as warehouses and commercial spaces and flooring functionality is of primary concern. The result is a hardwearing floor that offers a safer and cleaner environment. The minimal lifetime cost, low-maintenance and high durability makes the HIPERTROWEL™ system of great benefit to any factory environment.

BENEFITS:

- ✓ Economical alternative to epoxy or paint
- ✓ Non-dusting, non-marking surface
- ✓ Abrasion-resistant
- ✓ Durable and hard wearing
- ✓ Minimal lifetime cost

HIPERTROWEL™
